

Early Intervention Risk Management Program

Cost Contained Health Innovations

601 Montgomery Street, San Francisco, CA 94111

The CCHI Mission

We are committed to managing claims so as to produce favorable financial results for our policyholders and insurers. We accomplish that goal without sacrificing a positive medical outcome for the patient by applying our decades of health care industry experience to find innovative solutions.

Why Early Intervention?

- ✓ Provide better patient care
- ✓ Better manage high-risk claims
- ✓ Reduce total cost of claims

The CCHI Early Intervention Solution

- ✓ Outreach to TPAs and UR, prior to claims
- ✓ In-house RN/CCM reviews claims, identifies potential high-cost cases
- ✓ RN/CCM confers with Client case manager
- ✓ Together they create a plan of action

The end result...

High risk cases are identified as early as possible, before costs are incurred, at a point where cost-control strategies can be implemented.

What this means to you

- ✓ Stabilized reinsurance costs
- ✓ Greater budgeting ability
- ✓ Guarantee plan savings from claims management
- ✓ Archived analytical data
(forward planning & management)

CCHI makes
reinsurance an
enabling solution
rather than a
plan expense.
